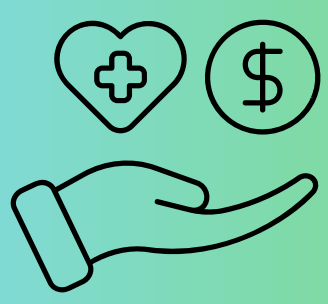
## SCIENCE FOR HUMANS AND ANIMALS

Boehringer Ingelheim, with its U.S. headquarters in Ridgefield, CT, is a global pharmaceutical company known for creating treatments for people and animals. From respiratory medications to vaccines and pet health products, they work on life-changing innovations across human and veterinary medicine. It's a great place to start if you love science, research, or health care.

.

## A COMPANY THAT CARES FOR YOU TOO



Employees enjoy competitive salaries, full health coverage, a strong retirement plan, generous time off, and tuition reimbursement. There's also access to on-site fitness, healthy meals, and wellness programs. Boehringer is known for its supportive culture and long-term employee loyalty.

## *IMPROVING LIVES AROUND THE WORLD*

Boehringer offers internships, co-ops, and early-career programs for students interested in lab work, production, tech, or business operations. Many start in entry-level roles and grow into research, quality control, manufacturing, or regulatory affairs. It's a learning-centered environment where curiosity and detail are rewarded.

## *MAKE A DIFFERENCE WITH DOLLARS*

.Working here means being part of a mission to create better health for people and animals alike. Whether you're helping develop a new cancer drug or ensuring pet vaccines are delivered safely, your work matters. It's not just a job—it's a global impact powered by science and compassion.
