HELICOPTERS BUILT IN YOUR BACKYARD

Sikorsky Aircraft, based in Stratford, CT, is famous for building some of the world's most advanced helicopters—including the iconic Black Hawk. As part of Lockheed Martin, Sikorsky plays a key role in U.S. military aviation and offers tons of career opportunities in manufacturing, engineering, tech, and support services.

STRONG PAY, STRONGER SUPPORT

Sikorsky offers competitive wages, excellent healthcare, a 401(k) with matching, paid vacation, and tuition reimbursement. Union-backed positions add job protection and scheduled raises. With Lockheed Martin behind it, you also get stability and long-term growth opportunities in the defense and aerospace industries.

GET TRAINED, GET HIRED

You don't need to be a helicopter expert to start here. Sikorsky partners with training programs and community colleges to prepare new hires through hands-on learning. Apprenticeships, internships, and technician roles make it possible to start right out of high school and grow into more advanced jobs over time.

WORK WITH IMPACT

Every day at Sikorsky, you're helping build aircraft that protect lives and serve missions around the world. Whether you're welding, wiring, coding, or coordinating, your work matters. The team atmosphere is strong, and there's real pride in building something that flies—especially when it's built in Connecticut and used around the globe.

CAREER CLUSTER: MANUFACTURING, STEM, TRANSPORTATION & ENGINEERING

PERFECT FOR STUDENTS INTERESTED IN BUILDING HELICOPTERS, AEROSPACE ENGINEERING, ROBOTICS, AVIATION MECHANICS, AND CAREERS IN NATIONAL DEFENSE AND CUTTING-EDGE FLIGHT TECHNOLOGY.
